CAREER OVERVIEW

I am an aspiring software engineer actively involved in the web development world, focused on developing scalable and efficient systems. I built supplier management and queuing systems with Bootstrap, Laravel (Framework & Livewire), PHP, JavaScript, and MySQL. I am a solution-minded developer with a hunger for learning new technologies and the knowledge to keep your application running at peak performance and high quality.

EXPERTISE

☑ **Frontend** - Bootstrap (Framework), CSS, HTML, JavaScript, Laravel (Framework).

☑ **Backend** - Java, JavaScript, Laravel (Livewire), PHP, Python, MySQL.

☑ **Other Skills** - Hardware & Software Troubleshooting, Networking, PC Assembling.

EDUCATION

NATIONAL UNIVERSITY LAGUNA – ASIA PACIFIC COLLEGE PROGRAM EXTENSION
Bachelor of Science in *Information Technology*
August 2020 - July 2024
Dean's Lister (1st Honor of 3rd Trimester A.Y 2021-2022)

PROJECT

NETI: Supplier Management System - It is a basic tool for managing suppliers, which facilitates administration and communication and ensures access to relevant supplier information in real time when managing contracts and ordering.

- ⚙ **Programming Language** - Bootstrap, JavaScript, Laravel (Framework & Livewire), MySQL.
- 📋 **Role** - One of the Developer and UI/UX designer for the project of NYK.

NU Laguna: Queueing System - It is an obvious and practical system that promotes staff operations and enhances the customer-employee experience.

- ⚙ **Programming Language** - Bootstrap, CSS, HTML, JavaScript, PHP, MySQL.
- 📋 **Role** - One of the Developers and Project Leader of Other Offices group.

NU Catalogue: Inventory Management System - It facilitates inventory and customer information management and it relieves the burdens related to data management as the program produces daily sales reports.

- ⚙️ **Programming Language** - Bootstrap, CSS, HTML, JavaScript, PHP, MySQL.
- 📇 **Role** - One of the Project Researcher and Project Leader.
